Meteorologist's View

A vastly improved day for hill walking with some excellent views to be found, especially by the afternoon. It will be feeling much cooler, however with the strong northwesterly winds on the summits giving a noticeable wind chill. Despite this, UV levels will be Moderate during the midday hours on the summits so sun protection is advised.

Forecast for Tuesday 10 Sep 2024

Weather: A cloudier day is in store with sunny or bright intervals during the morning and a chance of showers. Probably more frequent showers or longer spells of rain through the afternoon, before clearing south during the evening. Perhaps remaining cloudy until after dark across some hills.

Maximum wind: Northwesterly 30 mph with gusts of 40-45 mph.

Chance of cloud-free hill tops 600m: 40% improving to 80% by late afternoon

Low cloud and visibility: Periods of cloud obscuring hills above 600m, mainly in association with showers or longer spells of rain during the afternoon. Generally good visibility, but occasionally moderate in showers or rain and poor in any cloud.

Temperature: **Valleys:** Plus 10 Celsius rising to plus 16 Celsius.
At 600m: Plus 10 Celsius.
Freezing level: Above the summits.
